EDUCATION

•Computer engineer

2018-2022

Universidad Autónoma de Baja California

EXPERIENCE

•Frontend developer (E-commerce)

Mar 2023 - Now

Sol Beauty & Care

Remote

- Architected and documented a modular ERP template using Vue.js, enabling rapid development of internal tools for managing influencers, commissions, media assets, and role-based user access.
- Led frontend development of the company's flagship e-commerce platform using Remix (React), integrated with Shopify as the content layer.
- Built custom Shopify Apps to streamline operations, including automated inventory label printing and dynamic product bundling at checkout.
- Refactored and migrated legacy ERP modules to modern web architecture, improving performance and maintainability.
- Actively partnered with cross-functional teams (UX, marketing, backend, and data ops) to deliver user-centric, scalable solutions.

•Web developer

Jul - Dec 2022

Grupo Gurú

- Built responsive, SEO-friendly websites for clients across diverse industries using WordPress, customizing themes to meet branding and functionality needs.
- Developed custom JavaScript scripts to extend site capabilities, including dynamic content rendering, form validation, and user interaction features.
- Performed basic server administration and site configuration using cPanel, ensuring stable deployment environments and smooth domain/email setup.

PROJECTS

•React Admin Template 🌀

Modern starter template for scalable React projects – React, TypeScript, Vite, CSS

- Developed a professional, production-ready template to help teams rapidly launch React applications with best practices in place.
- Architected a flexible project structure with clear separation of concerns for scalability.
- Engineered a clean, modular codebase with reusable components and optimized build processes.

•Social Events Service 🌀

Backend microservice for managing social events – C# (.NET 8), SQLServer

- Designed and implemented a backend microservice to handle event creation, updates, and attendee management.
- Utilized .NET 8 for high performance, scalability, and maintainable code.
- Developed RESTful APIs for seamless integration with front-end and mobile clients.
- Containerized the service using Docker to ensure portability and streamlined deployment.

SKILLS

Frontend Development: React, Remix, Vue, HTML, CSS, TailwindCSS.

Backend Development: ASP.NET Core, Entity Framework, Node.js, Express.

Databases: SQLServer, MySQL.

Programming Languages: Typescript, Javascript, C#, C, Java.

Tools: Git, Github, Github Actions, Docker, AWS, Linux, Google Cloud Platform.

Languages: English and Spanish.

Relevant Knowledge: Data Structures & Algorithms, Object Oriented Programming (OOP), Database Management, Software Engineering, Technical Documentation.

Soft Skills: Proactive, Individual and team work, Work under pressure, Responsibility and Adaptability.
